The Hacınınoğlu Regulator and HEPP located at the lowermost downstream part of the Kandil
Power Group Projects is on Ceyhan River within the Upper Ceyhan basin upstream of the
Menzelet Dam in Kahramanmaraş. The regulator dam is of frontal type concrete gravity type
with gated water intake. The HEPP has the installed capacity of 130 MW and annual energy
generation of 360 GWh. Involving a 5500m energy tunnel construction, the Project consists of
the civil works, hydromechanical equipment supply and installation.
